

## 1. Standard normal table

The entries in this table provide the numerical values of  $\Phi(z) = \mathbf{P}(Z \leq z)$ , where  $Z$  is a standard normal random variable, for  $z$  between **0** and **3.49**. For example, to find  $\Phi(1.71)$ , we look at the row corresponding to **1.7** and the column corresponding to **0.01**, so that  $\Phi(1.71) = .9564$ . When  $z$  is negative, the value of  $\Phi(z)$  can be found using the formula  $\Phi(z) = 1 - \Phi(-z)$ .

$z$	0.00	0.01	0.02	0.03	0.04	0.05	0.06	0.07	0.08	0.09
0.0	.5000	.5040	.5080	.5120	.5160	.5199	.5239	.5279	.5319	.5359
